

INVASIVE PLANTS RECORDING FORM

This form has been designed to facilitate the recording of alien plant species such as **Japanese knotweed** (*Fallopia japonica*), **Himalayan balsam** (*Impatiens glandulifera*) and **giant hogweed** (*Heracleum mantegazzianum*) in Powys and Brecon Beacons National Park. Records will be used by the Biodiversity Information Service (BIS) to learn more about the distribution of these species and will be used by the Powys Alien Species Working Group which is aiming to control the invasion of these species for the protection of native biodiversity.

For assistance with the identification of these species or the completion of this form (including working out an OS grid reference) please contact BIS on (01874) 610881.

Health and Safety warning: Please take care when observing these species, especially as they often occur along roadsides and water courses. Do not touch giant hogweed, as any contact can cause painful blistering and severe irritation.

Do not collect samples of any species as this may encourage their spread.
